

# **Geocaching Activity for Bigfoot Camporee 2010**

("geo" for geography and "caching" for hiding goods!)

Our goal is to help teach a new technology in the use of GPS, by way of an electronics-driven treasure hunt at Camporee. We have tried to make it an easy first course that all will enjoy.

Scout Masters: Instruct your boys in the use of the GPS and then shadow coach them to the first cache. After that, stand back and watch as they find the rest of treasure caches with ease.

Encourage the boys to:

- \*Share the experience with others in the group, by letting everyone get involved.
- \*When a find is made, if you take something from the cache, leave something also.
- \*Re hide the cache box where and how you found it, so others can have fun finding it using the instructions provided.
- \*Sign the cache log, telling us that you did find the treasure! Be sure to give us your troop#.
- \*Be sure to have fun and be respectful of your surroundings!!!!!!!
